

Kenneth G. Azcurra

Senior Software Engineer | AI Engineering

Senior Software Engineer and Technical Lead with 9+ years of software engineering experience, including hands-on AI Engineering with Claude Code, Codex, AI agents, multi-agent workflows and reusable agent skills. Experienced in system architecture, APIs, performance tooling, observability/debugging, and data-backed applications. Former professor teaching Unity engine best practices, code structure strategies and design patterns (2020–2023).

Location
Buenos Aires, Argentina
(GMT - 3)

Education

2015-2019
Game Programmer and Designer
Escuela Da Vinci

Core Skills

- Unity
- C#
- Agile (Jira, Trello, Clickup)
- Software Engineering
- AI Engineering (Agents | GenAI)
- Prototype iteration

Language

English
(*Full professional proficiency)*

Spanish
(*Native proficiency)*

Experience

2026 - PRESENT
Trick Studios | Argentina (Remote)

Senior Unity Engineer

C# | Software Engineering | AI Engineering | GenAI | Claude Code | Codex | AI Agents | Multi-Agent Systems | Agent Skills | System Architecture | APIs | Performance Tools | Git

- Designed and implemented AI-assisted tooling for a custom game engine using Claude Code and Codex, including multi-agent workflows, specialised agents and reusable agent skills.
- Built AI-driven performance and developer tools to support profiling, debugging, optimisation and repeatable engineering workflows.
- Worked on agent structure, tool usage and workflow design with emphasis on maintainability, traceability and reliable outputs across development tasks.

2020 - 2026
Gamkat | United Kingdom (Remote)

Technical Director

Software Engineering | C# | AI-assisted Development | System Architecture | SOLID | Design Patterns | APIs (REST/SOAP) | Performance | Observability/Debugging | CI/CD | Git | PlasticSCM | Sentry | PlayFab | Multiplayer | Unity Editor Tools

- Led engineering delivery for production software projects, owning technical direction, estimations, architecture decisions and execution.
- Managed up to 5 programmers through code reviews, sprint planning, Jira task management and mentoring, translating technical constraints into clear implementation plans.
- Established coding, review and debugging standards to improve reliability, maintainability and delivery quality.
- Diagnosed and optimised performance across mobile and console builds using profiling and observability tools.

2024
The Polygon Loft | United Kingdom (Remote)

Lead Gameplay Programmer

Jira | Trello | Unity | C# | Game AI | Gameplay Programming | System Architecture | SOLID | Design Patterns | Steam SDK | Sentry | Git | PlasticSCM | Unity Cloud (CI/CD) | Unity Editor Tools

- Designed and implemented playable prototypes in under a week per build, using SOLID principles and design patterns so prototype code could carry into later development.
- Led a team of 3 programmers from prototype to vertical slice through code reviews, sprint oversight, and Jira task management.

2018 - PRESENT

KennethDevelops | Buenos Aires, Argentina

Engine Tool Developer

Trello | Unity | C# | UI/UX | uGUI | UI Toolkit | System Architecture | DLLs | SOLID | Design Patterns | Git | Unity Editor Tools

- Designed and implemented different unity engine tools to improve productivity for game developers.
- Some products were published on the Unity Asset Store (Event Manager, and Localization Manager), and others were hand-crafted for clients.

2017 - 2020

Ape Republic Studios | Buenos Aires, Argentina

Lead Game Programmer & UI/UX Designer

Trello | Unity | C# | Game AI | UI/UX | uGUI | Gameplay Programming | System Architecture | SOLID | Design Patterns | Git | Unity Editor extensions

- Designed the code architecture and implemented all it's technical requirements.
- Designed, animated and integrated UI/UX for the main project.

2013 - 2018

Redmond Software S.A. | Buenos Aires, Argentina

Full-Stack Software Developer

C# | C++ | Java | SQL | OracleSQL | PostgreSQL | REST | SOAP | Data-backed Applications | Database Design | Server Architecture | Linux Bash | PowerShell | Spring | Maven | Jenkins (CI/CD) | Git

- Designed and managed Oracle databases used by Java applications, including schema design and data access requirements.
- Built and consumed REST and SOAP APIs, integrating application, server and data layers across production systems.
